## Economic Development & Tourism Planning

RIVER STREET  
PLANNING & DEVELOPMENT

### Town of Malta Green Space and Economic Development Plan

River Street Planning is currently completing an Economic Development Plan for the Town of Malta that focuses on attracting new and different businesses to Malta. The Economic Development Plan includes a generalized market assessment of the Town of Malta, opportunities and constraints analysis of the local economy, evaluation of available commercial space, build out scenarios for vacant land and forecast for the housing mix needed to accommodate the Town's expected population growth over the next twenty years. River Street also facilitated the public participation process through community workshops and focus group meetings.

### River Street Services:

Public process, economic development plan, build out analysis and cost of services analysis.
